2026 Major Transits

The Planetary Movements That Shape the Year — & What They Mean for the Collective

The planets are always in motion — and their movements through the zodiac create the backdrop against which all of our personal stories unfold. These are the major transits of 2026: the cosmic weather patterns that will shape the collective experience of the year.

SATURN IN ARIES

February 2026 onwards

Saturn — the planet of structure, accountability and long-term growth — moves into bold, pioneering Aries. The collective is called to build with courage. Old structures that no longer serve are dismantled to make room for something more authentic and alive.

JUPITER IN CANCER

From June 2025, through 2026

Jupiter expands everything it touches — and in Cancer, it expands our emotional world: home, family, roots and belonging. The collective mood is nurturing and inward-looking. This is a year to invest in what truly nourishes.

NEPTUNE ENTERS ARIES

March 2025 — settling in 2026

Neptune — the planet of dreams, spirituality and dissolution — crosses into Aries for the first time in 165 years. The collective imagination is ignited. A new spiritual vision is being born, but it requires discernment. Inspired action — not escapism.

URANUS IN GEMINI

From July 2025 onwards

Uranus — the great disruptor — moves through Gemini, revolutionising the way we think, communicate and exchange information. The collective mind is rewiring. New ideas arrive fast. Old certainties dissolve. Stay curious and stay flexible.

PLUTO IN AQUARIUS

Fully established 2026

Pluto's long transit through Aquarius — which began in 2023 — is now firmly embedded in the collective experience. The transformation of society, technology and collective identity continues. The question is not whether the world changes — it is how consciously we participate.

SATURN SQUARE URANUS

Building through 2026

One of the defining tensions of 2026: Saturn (structure, tradition) in Aries squares Uranus (revolution, freedom) in Gemini. The collective feels the friction between the old world and the new. This aspect breaks what needs breaking and builds what needs building. Expect disruption followed by unexpected liberation.

JUPITER TRINE SATURN

Mid 2026

A rare moment of cosmic cooperation between expansion (Jupiter) and structure (Saturn). What has been built with care has the chance to grow. The collective energy is productive, hopeful and grounded. Make the most of this window — it rewards effort generously.

MARS IN CANCER & LEO

Through early 2026

Mars — the planet of drive and action — moves through sensitive Cancer before igniting in Leo. The collective energy shifts from protective, emotionally-driven action to bold, creative self-expression. By the time Mars reaches Leo, the world wants to be seen.

VENUS RETROGRADE

March — April 2026

Venus turns retrograde in Aries — a powerful invitation for the collective to review values, relationships and self-worth. What have we been pursuing that no longer reflects who we truly are? This retrograde calls for honesty about what — and who — we truly love.

MERCURY RETROGRADE x3

February, June & October 2026

Mercury's three retrograde periods in 2026 fall in Air signs — Aquarius, Gemini and Libra. Communication, technology and ideas are the recurring themes. Back up your work, slow down decisions and use each retrograde as an opportunity to refine rather than rush.

ECLIPSES: VIRGO & PISCES AXIS

Throughout 2026

The eclipse cycle shifts to the Virgo-Pisces axis in 2026, activating themes of service versus surrender, health versus escapism, and the sacred in the everyday. Eclipse seasons in March and September bring pivotal collective turning points — especially around healthcare, spirituality and the environment.

NORTH NODE IN LEO

From January 2026

The collective north node — the point of growth and destiny — moves into Leo. Humanity's evolutionary path points toward creative courage, authentic self-expression and heart-led leadership. The invitation is to shine — not for ego, but for genuine contribution to the whole.
